Paptic® - a sustainable superstar!

Hunter is creating a genuine revolution in plastic film bags in conjunction with Paptic®. Sourced from sustainable wood fibre, delivering the qualities of both paper and plastic, this could be a genuine game-changer for cosmetic, gifting and shopping bags.

Paptic®'s superstar credentials include:

Eco-friendly and sustainable:

Paptic® is a bio-based, recyclable and renewable material.

Multi-use and versatile:

The material moves beyond the limits of paper, allowing Hunter to produce across a wide range of flexible applications.

Adapts to existing production lines:

Substrates are heat-sealable and can use the same glues as used for paper bags and luxury packaging.

Ideal for presentation of luxury brands:

We print with flexo-printing, UV-ink jet, using commercial standard inks.

Gives brands the right gravitas:

Paptic® material delivers a soft and luxurious texture, meeting the performance needs of Hunter's luxury brand clients. Current weight ranges between 70–110gsm.

AWARDS:

- Winner of Bio-based Product of the Year 2017 (Biobased Live, Amsterdam, June 2017)
- Winner of the ExpoLive Innovation Award Grant (ExpoLive, Dubai, August 2017)
- 2nd position of Innovation Award "Bio-based Material of the Year 2017" (International Conference on Biobased materials Live, Cologne, May 2017)
- Finalist of LVHM Innovation Award (Vivatech, Paris, June 2017)
- Finalist of the LuxePack in Green competition (Luxepack, Monaco, October 2017)
- Finalist of PPI Innovation Award (CEPI European Paper Week, Brussels, November 2017)
- 3rd place in European Paper Recycling Awards (Brussels, October 2017)
